- ❖ Administrative and logistical action plans
- ❖ Debriefing steps of a line-of-duty death process
- ❖ Stages of grief cultural differences
- ❖ Care for the organization and the surviving family
- ❖ CISM components after a LODD / injury

### WHO SHOULD ATTEND:

This class is centered around the emergency service provider to include Police, Fire, EMS, Dispatchers, Corrections, Military Personnel, Medical Personnel, School Administrators, Municipal Officials, CISM teams, and others for what may be the toughest situation they will ever face. Line Of Duty Death policy ensures you have the tools you need to navigate through a very difficult situation. This course will help to prepare you. Are you prepared?

This course will be taught by international critical incident stress foundation (ICISF) instructor Paul V. Jockimo. Mr. Jockimo is a veteran of over 20 years in Public Safety, Fire, and EMS. He is currently working for the Westchester County (NY) Dept. of Emergency Services. A member of the ICISF's Speakers Bureau, as well as an approved instructor, Paul has gained national recognition for speaking on CISM and LODD issues.

One of the toughest situations to face is the line-of-duty death. The administrative and logistical aspects of a LODD are often overwhelming to those individuals and agencies that are ill prepared. This course will address many of those issues as well as give special attention to pre-incident planning and proper follow-up services. This interactive class has been designed to prepare emergency service providers, military personnel, school administrators, municipal officials, as well as CISM teams who may need to address line-of-duty death.
